Linear Low Density Polyethylene

LL0220AA

LL0220AA is linear low density polyethylene copolymer containing butene-1(C4) as comonomer.It is suitable for blending with conventional LDPE for cast film applications and blown film for light duty film applications Film made from pure LL0220AA has the following advantages over LDPE:
good balance of mechanical properties,good optical properties.This grade has food contact approval
Applications:
light and medium duty films,stretch film
